Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .rods arranged in flow-lines, suggestive of a vanished mineral which had a prismatic form. This rock is far too much altered to be determinable. The matrix is like that of many andesites, but the felspar is too much altered to furnish decisive evidence of its original composition. The predominance of white mica as the replacement mineral suggests orthoclase. Indeterminate. Locality.--Upper shaft, Adelaide Claim, Una Hill, Thames district. Formation.--Thames-Tokatea group. Remarks.--This may be a fine-grained and indurated breccia, such rocks being met with at higher levels on the west slope of Una Hill. No. 339/748. M.C.--Black basalt-like rock, with small phenocrysts. U.M.--Matrix: Very little, and showing insensible passage from smallest constituents to largest. The most minutely crystalline material consists of felspar (plagiociae) laths and rectangles, minute prisms of pyroxene, and octahedra of magnetite, with interstitial chlorite that may possibly represent altered glass. The minute pyroxene prisms, not so large as many of the magnetite grains, are perfectly fresh. Phenocrysts.--Plagiociae: Abundant but not large crystals, sometimes in radiate grouping; zonal; twinning wedgy; ext., 20/23, 25/27 (andesine, andesine-labradorite). The plagiociae is fresh, but alteration is commencing; carbonates are present in many, and some of the inclusions are converted into chlorite. Augite: Fresh, colourless or nearly so, commonly in mosaics, twinned once or twice. Hypersthene abundant, in all stages of serpentinisation, contributes to the mosaic of augite grains, and sometimes includes augite. Hornblende: Resorption pseudomorphs of large size fairly numerous; reaction borders curiously zonal. Carbonates sporadically present, also an irregular...
