

ICD-10-CM 2016 Snapshot Coding Cards: Multiple Specialties: Ophthalmology

ICD-10-CM Snapshot 2016		Ophthalmology	
Ophthalmology Coding Tip Many of the codes for eye disorders indicate laterality, specifying whether the condition affects the right, left, or is bilateral. If no laterality code is provided, the condition is bilateral. Assign separate codes for the left and right eye. If the eye is not identified, assign the code for the unspecified eye. Except where noted, the codes indicating the condition involve 2 (bilateral), 3 (right eye), 4 (left eye), or 5 (unspecified). For codes requiring a 9th character, the number of the 9th character indicates that an additional digit is necessary.
